

Looking to safely transport eggs, sperm, or embryos?

LifeParcel is an embryologist-owned cryo-shipping company specializing in hand-carry transportation of genetic materials worldwide.

Operating in 32 countries, we ensure safe and secure delivery of sensitive genetic materials for fertility clinics, research organizations, and hopeful parents-to-be.

“

The team and LifeParcel really cared — they took care of everything.

— A. W.

Our concierge, Ilana, provided comprehensive information about the process and answered every question with great patience and empathy. She went above and beyond to ensure things moved quickly. I truly felt there was someone who cared and supported us throughout the entire journey.

— LIRON COHEN

Our mission

Our mission is to alleviate the stress of fertility material transport, allowing our clients to focus on their path to parenthood with complete peace of mind.

We provide safe, efficient, and compassionate transport of eggs, sperm, embryos, stem cells, and more, combining cutting-edge logistics with a deeply personal approach.

Embryologist-led. IVF clinic approved. Parent trusted.

2,500 successful missions since 2009

Trusted by **150+** clinics

Trusted by **3,500+** parents worldwide

Operating in **32** countries on **5** continents

**WHEREVER
IT TAKES™**

We don't ship. We chaperone.

Because your precious parcel deserves more than a shipping label

STANDARD SHIPPING

vs

LIFEPARCEL

- Multiple handlers; potential for misplacement

- Routine, potentially harmful X-ray scanning at checkpoints

- Fluctuating temperatures, limited monitoring

- May face customs delays or issues

- You handle clinic communication

- Call centers with long wait times

- Your specimen never leave our couriers hands

- No X-ray exposure, ever

- Constant -196°C temperature, monitored 24/7

- Expedited customs process

- Coordinated with your clinic for seamless transfer

- Dedicated concierge available 24/7
